

# SPEEDTHREADER™ - MOLLE/PALS WEB GEAR

MAG220

BLK

NSN: 8465015654798

The patent-pending Speedthreader is designed to dramatically improve the speed and ease of configuring MOLLE/PALS webbing. The device clips onto the strap of a modular pouch and guides it smoothly through the vest webbing for hassle-free interlacing. Speedthreader can attach a two-strap pouch (interlaced correctly) in about 60 seconds.

Can also be used as a Go/No Go gauge for webbing.
