

MBUS PRO[®] SIGHT - REAR

MAG276

BLK

NSN: 1005016285113

The new MBUS Pro. The all-steel back up sighting solution that delivers maximum functionality and strength with minimum bulk at a price that's even smaller than its size. The dual aperture, windage adjustable rear and no-tool, elevation adjustable front excel in all 1913 Picatinny rail mounting applications, including rail-height gas blocks.

Positive detents keep the MBUS PRO front and rear at standard AR sight height when deployed, and so low when they are stowed that you'll never notice them until they're needed. Narrow width front is compatible with most IR aiming laser and light installations for the professional user.

- All steel construction
- Selectable large and small same-plane apertures
- Positive detents in both the up and down positions
- .375" height above rail at mid-point when stowed
- Standard AR sight height when deployed
- Windage adjustable with low-profile knob
