

PMAG[®] 25 LR/SR GEN M3[®] WINDOW, 7.62X51

MAG292

BLK

NSN: 1005017183977

The 7.62x51 NATO (.308 Winchester) PMAG 25 LR/SR GEN M3 Window is a lightweight, cost effective, high reliability magazine for SR25/M110 pattern rifles featuring true 25-round capacity, constant-curve body, anti-tilt follower, snap on Impact/Dust Cover, and features transparent windows to allow rapid visual identification of approximate number of rounds remaining.

The PMAG 25LR/SR brings GEN M3 improvements to the LR line along with "more of a good thing" in the form of 25 rounds of capacity. Keep track of those rounds with Mag-Level™ Window functionality, for the first time, now available in a 7.62 PMAG. Because of the wide variations in .308 rifle magazine well specifications and the desire to achieve drop free performance with minimum specification rifles while still maintaining strength, the PMAG 25 LR/SR is optimized for ammunition within SAAMI specifications for overall length. For match length ammunition we will be releasing a 25 round solution in Fall 2014 that will still drop free from all but the smallest magazine wells, but will accommodate ammunition over SAAMI spec, including popular match and military match ammunition.

- Self-lubricating anti-tilt follower for increased reliability.
- Stainless steel spring for corrosion resistance.
- Aggressive non slip texture at the front and rear for superior grip.
- Paint pen dot matrix to increase durability of magazine identification.
- Strong, slim floorplate design that retains positive magazine handling and easy disassembly.
- MagLevel window allows for quick identification of remaining rounds.
- Optimized for SAAMI overall length ammunition and drop-free performance.
- Solution for longer OAL match ammunition coming Fall 2014.
