

MBUS PRO[®] LR ADJUSTABLE SIGHT REAR

MAG527

BLK

NSN:1005016688372

The new MBUS Pro LR capitalizes on the low profile and sleek styling of the original MBUS Pro, while adding the additional feature of an elevation adjustment wheel to accurately engage targets at variable distances.

With its all-steel construction, this is the sighting solution that delivers no-tool adjustments, maximum strength, corrosion resistance, and functionality in a compact package. Positive detents keep the MBUS Pro LR at standard AR sight height when deployed and so low when stowed that you will hardly notice them.

Made in the U.S.A.

- Case hardened and finished with Melonite™ for extreme resistance to wear and corrosion
- Windage adjustable with low-profile knob; no tools required
- Standard AR sight height when deployed
- Positive detents in both the up and down positions
- Elevation adjustment wheel for 200-600 meter distances
