The next-generation PMAG 20 AR/M4 GEN M3 is a 20-round polymer magazine for AR15/M4 compatible weapons chambered in 5.56x45 NATO / .223 Remington. Along with its expanded feature set and compatibility, the GEN M3 incorporates advanced material technology and manufacturing processes for enhanced strength, durability, and reliability that exceed rigorous military performance specifications.

Includes GEN M3 features of long-life stainless steel spring, four-way anti-tilt follower and constant-curve internal geometry for reliable feeding, and simple tool-less disassembly for easy cleaning.

The PMAG 20 GEN M3 also includes a redesigned bolt catch notch in the rear of the magazine that provides increased bolt catch clearance, while an over-travel stop on the spine helps ensure the magazine will not over-insert on compatible weapons. Low profile ribs and aggressive front and rear texture give positive control of the GEN M3 in all environments, and a paint pen dot matrix has been added to the bottom panel of the body to allow easy marking for identification. The easy to disassemble flared floorplate aids extraction and handling of the magazine while providing improved drop protection, but is slightly slimmer than before for better compatibility with tight double and triple magazine pouches. An included pop-off impact / dust cover can optionally be used to minimize debris intrusion and protect against potential damage to the top cartridge during storage and transit.

Made in the U.S.A.

- Next-generation impact and crush resistant polymer construction
- The anti-tilt, self-lubricating follower ensures a smooth feed and magazine reliability
- Modified dimensions allow for wider compatibility with non Colt-spec platforms
- Utilize the paint pen dot matrix to easily identify magazines with different loadouts
- Flared floorplate aids magazine handling and disassembly, and is slim enough for use with many double and triple pouches
- 20-round magazine accommodates firing from a prone position
- Constant-curve internal geometry, over-travel insertion stop on the spine, and a long-life stainless steel spring ensure smooth feeding
- Pop-off impact / dust cover to minimize debris intrusion and for ammunition protection in storage and transit
