The M-LOK MVG is a light weight vertical foregrip that attaches directly to M-LOK compatible hand guards and forends. The M-LOK MVG is made from the same high quality polymer as other Magpul products, and uses the new Magpul TSP texture for positive control in all environments. With rounded contours and a shorter length, the M-LOK MVG has been optimized for use with the “thumb break method” of shooting and can also be used as a traditional vertical foregrip.
